

~~#~~ New idem: 1
Tokens:

Arduino, Raspberry Pi,
ESP32, S.T.M 32

Instance Jones:

Dracula: ||||

Dungeon RPG:

Generalize the
board to work
for other games
(don't implement
these games)

- Digital prototyping (Luke)
- Board design
- Manufacturing (physical/electrical)
- Dracula AI programming
- Game design
- Art design / UI
- Game logic
- RFID driver (Max)

↳ Elias Blanch

Steven Scott, Steven Viller

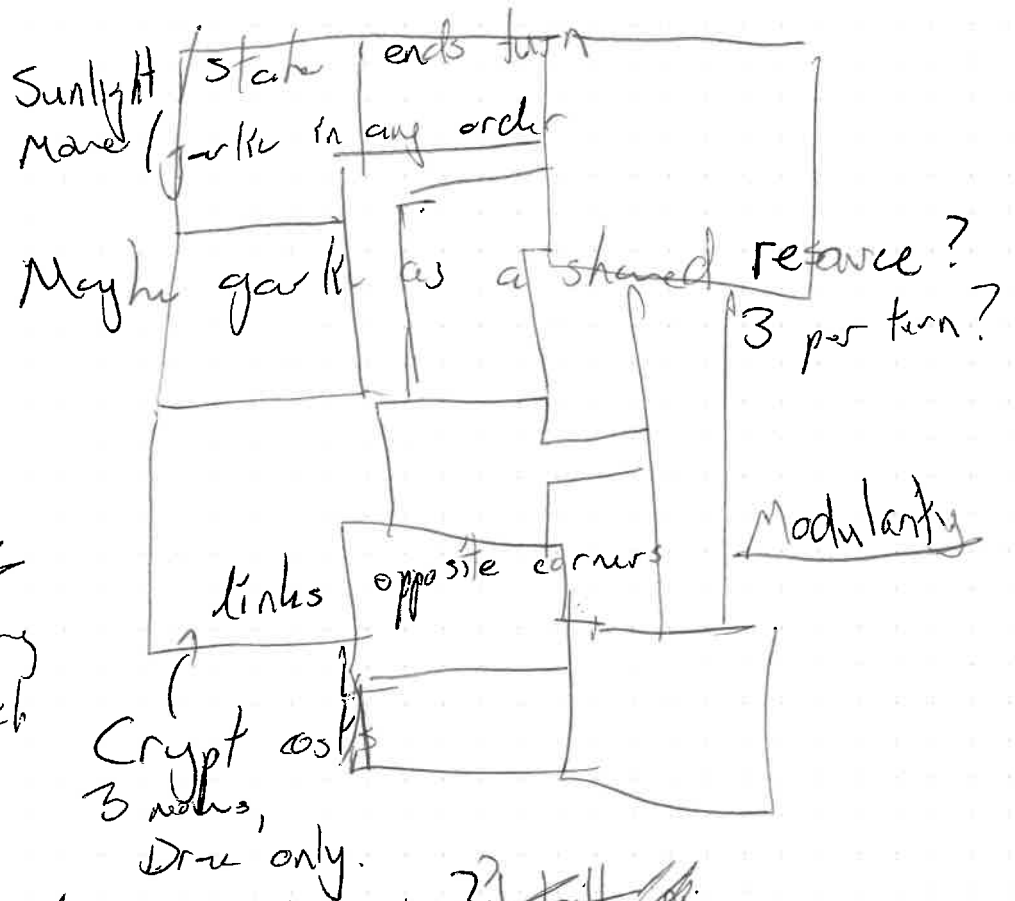

- Tank display - arduino

Heinrichs

- Tech involved
- Simplicity
- Fun
- ~~Possibility~~
- Accessibility

Players: 2 lives each

Drac: 3 lives

Alex

- Tokens and card game, ~~in~~
- Information hiding
- Simple, uses Tech

Stephen

- El Dorado ~~has~~ Arch Underworld minions? ~~will~~
- ↳ board generates the traps.

- Auto battlers
- ↳ Shop phase, battle phase, card phase

~~is~~

• Maybe Dracula could play?

- Able to change doors and walls.
- Secret tunnels?

• UI

↳ Addressable LED tape

Does Dracula need incentives to bite?

Crabe

- Regicide
- Fight the guy on the display.
